

WILLIAM LUJAN ARISPE

Data Analyst & Analytics Engineer

wlujan619@gmail.com — +591 76469893 — Cochabamba, Bolivia (Remote Ready)

[LinkedIn](#) — [GitHub](#) — [Portfolio](#)

PROFESSIONAL SUMMARY

Systems Engineering student (8th Semester) specialized in **Data Engineering** and **Business Intelligence**. I bridge the gap between backend development (Python, SQL) and business strategy. Expert in building automated **ETL pipelines**, cleaning complex datasets, and designing dashboards that drive decision-making. Proven track record of reducing manual reporting time by 90% through Python automation.

TECHNICAL SKILLS

- Data Engineering (ETL):** Python (Pandas, NumPy), SQL (SQLite, PostgreSQL), Data Cleaning, Automation.
- Data Visualization:** Power BI (DAX, Star Schema), Tableau, Matplotlib.
- Infrastructure & Tools:** Git/GitHub, Linux (Bash Scripting), VS Code, Docker basics.
- Languages:** Spanish (Native), English (B2/C1 - Professional Proficiency).

KEY PROJECTS

Automated E-commerce ETL Pipeline (Python & SQL)

[View on GitHub](#)

Technologies: Python, Pandas, SQLite, Matplotlib

- Designed an end-to-end **ETL pipeline** to ingest raw sales data containing intentional errors (nulls, outliers, negative pricing).
- Implemented **Pandas** scripts to clean and validate 500+ transaction records, successfully filtering 40% of corrupt data.
- Engineered a persistent storage solution using **SQLite**, ensuring data integrity for historical analysis.
- Automated the generation of a revenue dashboard, identifying 'Sucre' as the top-performing city for business strategy.

Credit Risk Strategic Dashboard (Banking Analytics)

[View on GitHub](#)

Technologies: Power BI, SQL, Star Schema

- Developed a risk assessment model analyzing 1,000+ loan applicants to identify default patterns.
- Designed a **Star Schema** data model in Power BI to optimize query performance and reporting speed.
- Uncovered that loans for Electronics and Cars had a 30% higher default rate than average, influencing credit policy recommendations.

PROFESSIONAL EXPERIENCE

Python Automation Developer (Freelance Consultant)

Remote — Jun 2024 – Present

- Developing B2B automation solutions to streamline data reporting and ETL workflows for clients.
- Reduced client reporting time from 10 hours to under 60 seconds by creating custom Python scripts.
- Implemented Web Scraping bots for competitor price monitoring and market analysis.

Technical Support Analyst - Tier 2

Cochabamba, Bolivia — Jan 2023 – May 2024

- Performed advanced diagnostics using **SQL queries** to verify data integrity in production environments.
- Automated server maintenance tasks using **Bash scripting** on Linux systems.
- Managed critical incidents under strict SLAs, maintaining a 99% resolution rate and creating technical documentation.

EDUCATION

B.S. in Systems Engineering (8th Semester)

Expected Graduation: 2026

Universidad Privada Domingo Savio (UPDS) – Cochabamba, Bolivia

- Focus: Database Management, Advanced Algorithms, Operating Systems.

CERTIFICATIONS

- Python for Data Science** - IBM Developer Skills Network
- SQL Advanced for Data Analysis** - LinkedIn Learning
- CCNA (Cisco Certified Network Associate)** - Networking Basics
